Packing

1- Slabs

1. Packaging in wooden bundles

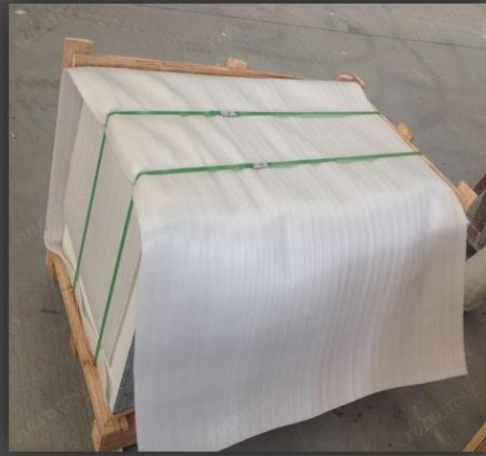

Packaging marble and granite slabs on wooden bundles with the best types of fumigated woods to assure free of agriculture pests via international certification bodies | the field of fumigation and pest control with considering using thick foam to prevent slabs from frictions & scratching or broke during logistics operations.

2.Regular loading (into 20 feet heavy duty containers)

Loading slabs manually on tow wooden bars was installed on container vertical sides and if slabs have longitudinal shape, the container bear duple groups of slabs only (right & left) But if slabs take horizontal short shapes, the container bear quadruple Groups as (2 groups in right & 2 groups in left) also all slabs are separated with plastic plates to prevention from scratching

2- Tiles

1.Packing in wooden boxes

Packing marble and granite tiles into heavy duty wooden boxes that have loading capacity up to 1 ton for every box.

Wooden boxes composed from with the best types of fumigated woods to assure free of agriculture pests via international certification bodies | the field of fumigation and pest control with considering using plastic plates that prevent slabs from frictions & scratching or broke during logistics operations and with using also thick foam plates between all sides of wooden box to make prevention from frictions between tiles and wooden boxes

2.Wooden pallets

Loading marble and granite tiles in wooden pallets and considering tight conditions with plastic belts that prevent tile from any damage according to size and thickness of tiles.
